

Obsession or Stubbornness?

From one pothole to a
reporting platform for
every Canadian city. And
why the caring mattered far
more than the code.

Eight months. One pothole.

Then a 12-minute form, five pages, a reference number, and a status page that never changed. That is where most people quit.

The cost of caring got higher than the value of caring.

Cupholders.

Volkswagen's engineers refused them for years. The car was a temple, not a coffee table. A hundred rational decisions, one human blind spot.

This is not about me.

My only specialty is
refusing to walk past a
problem. This time a
pothole. Next time
something else.

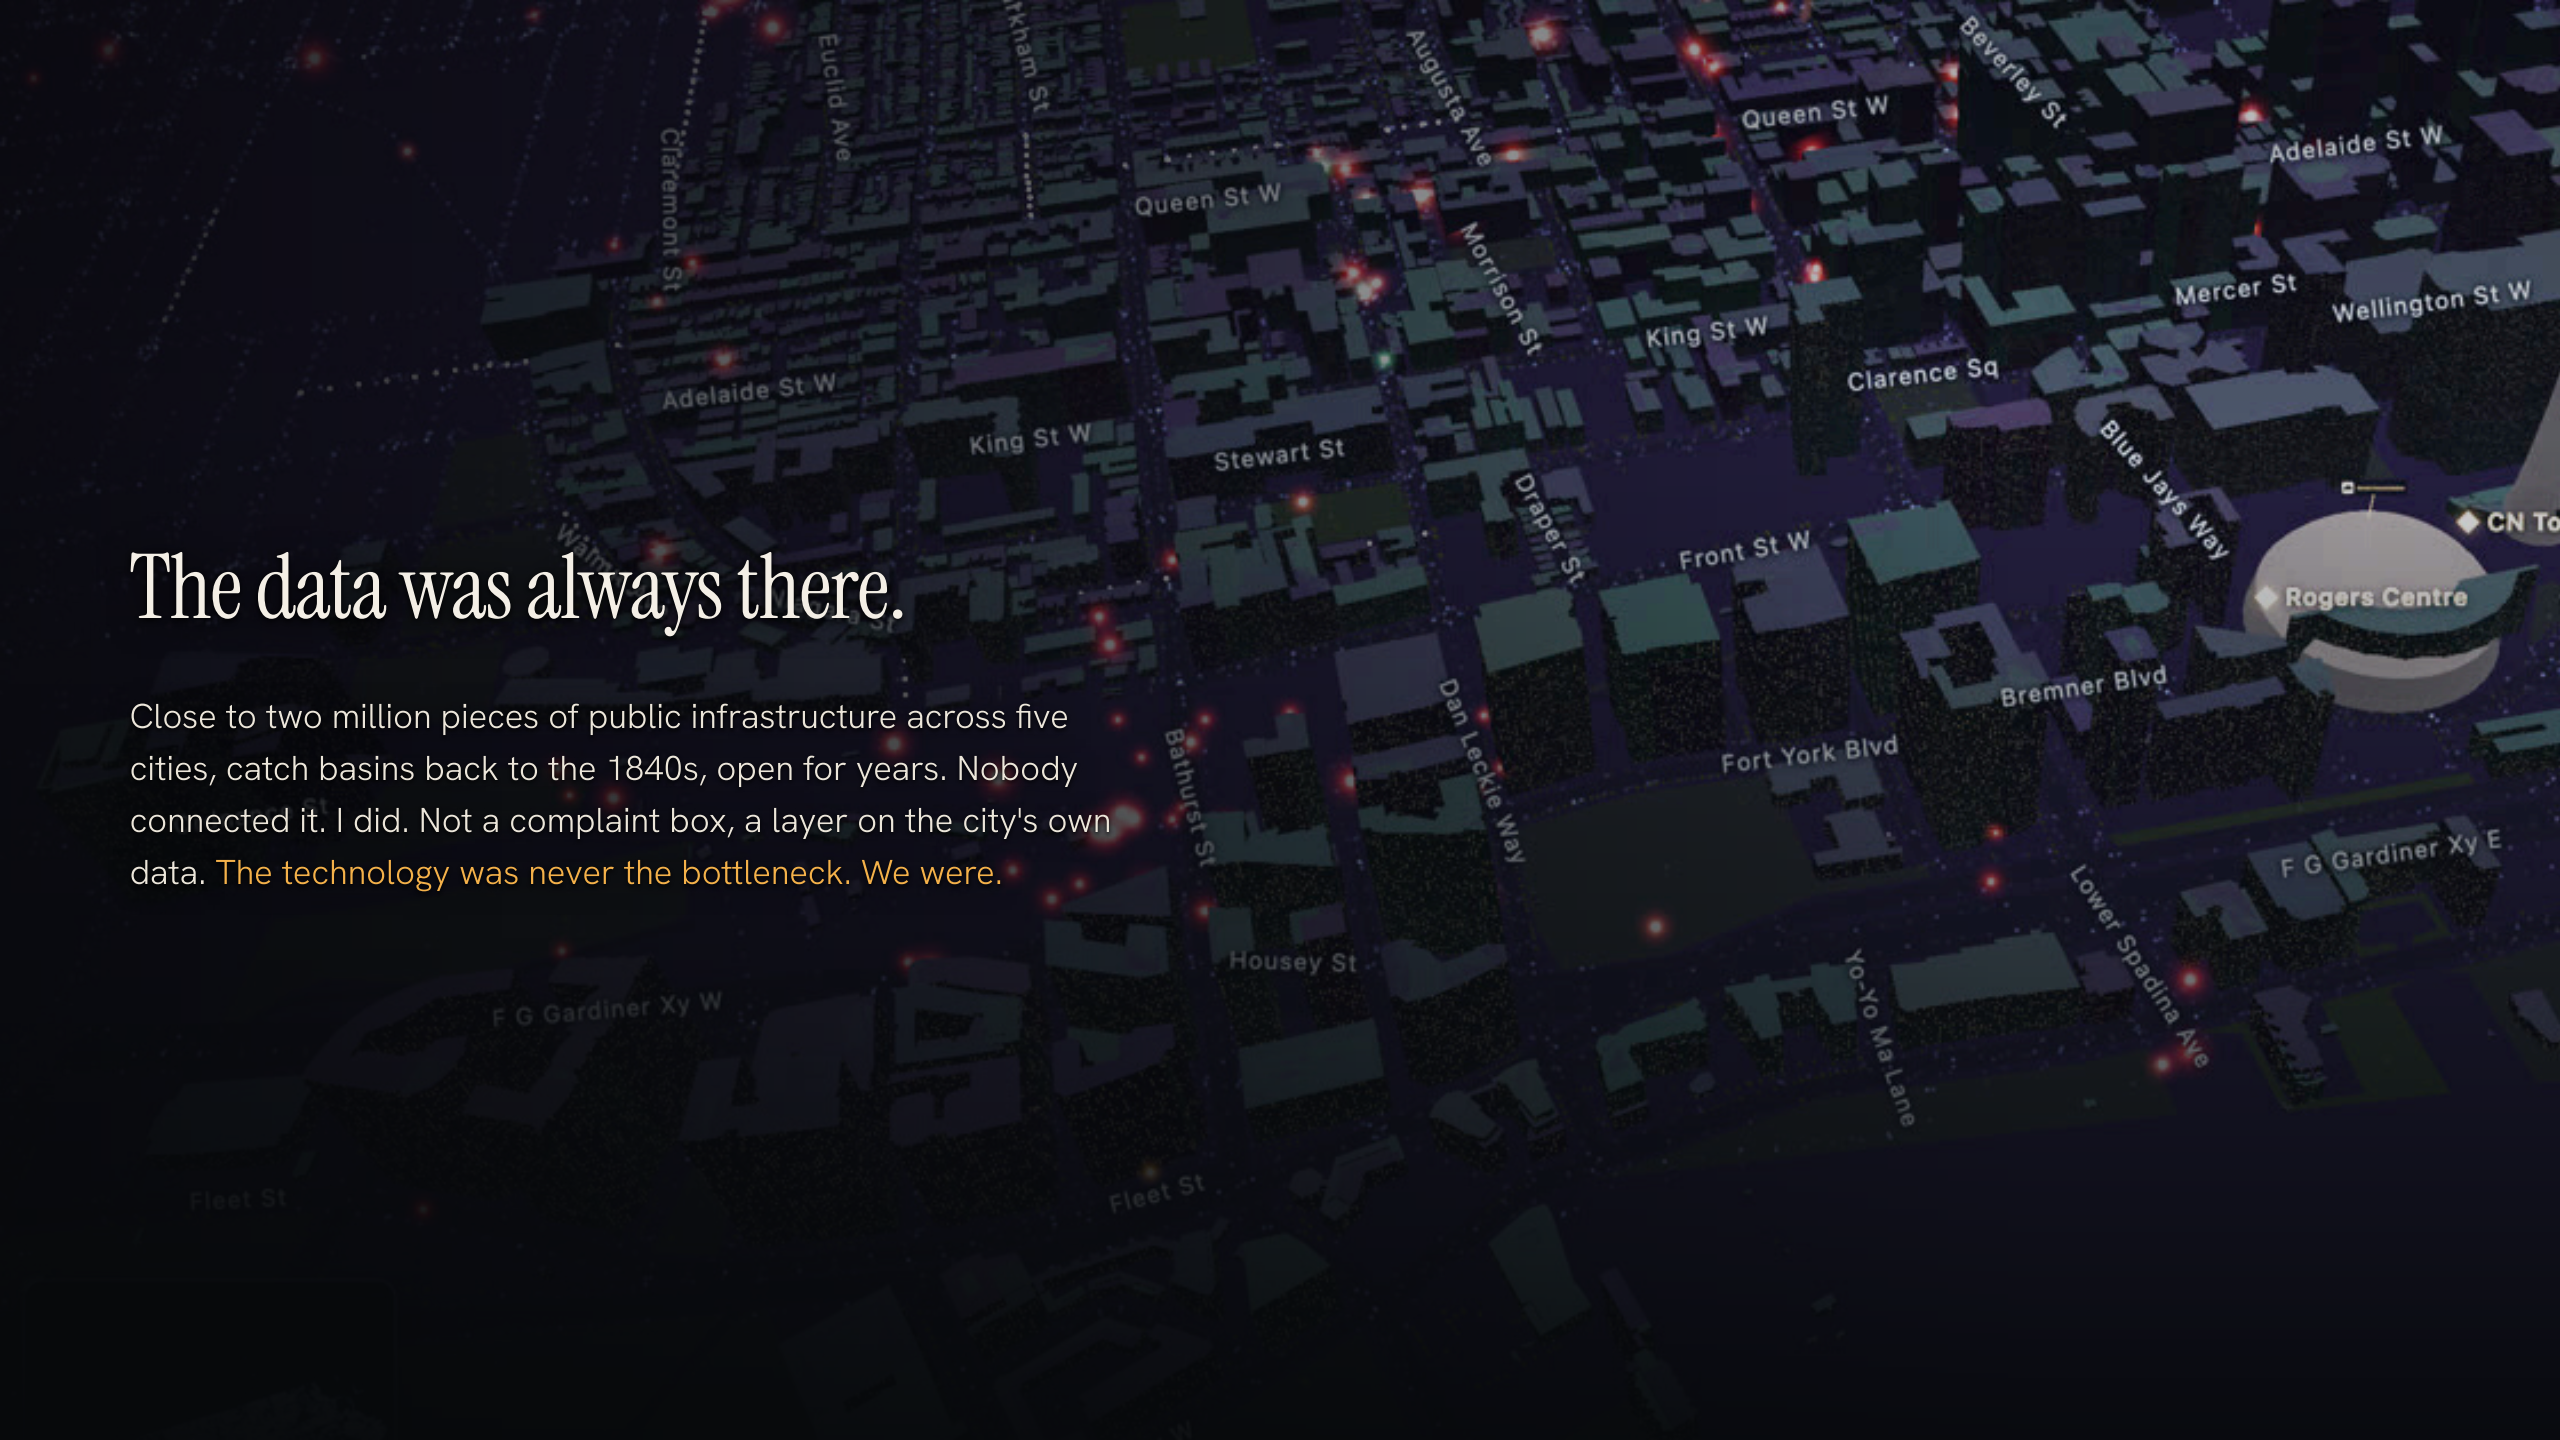

And it's not just me. Close
to a thousand reports
across five cities. People
came back.

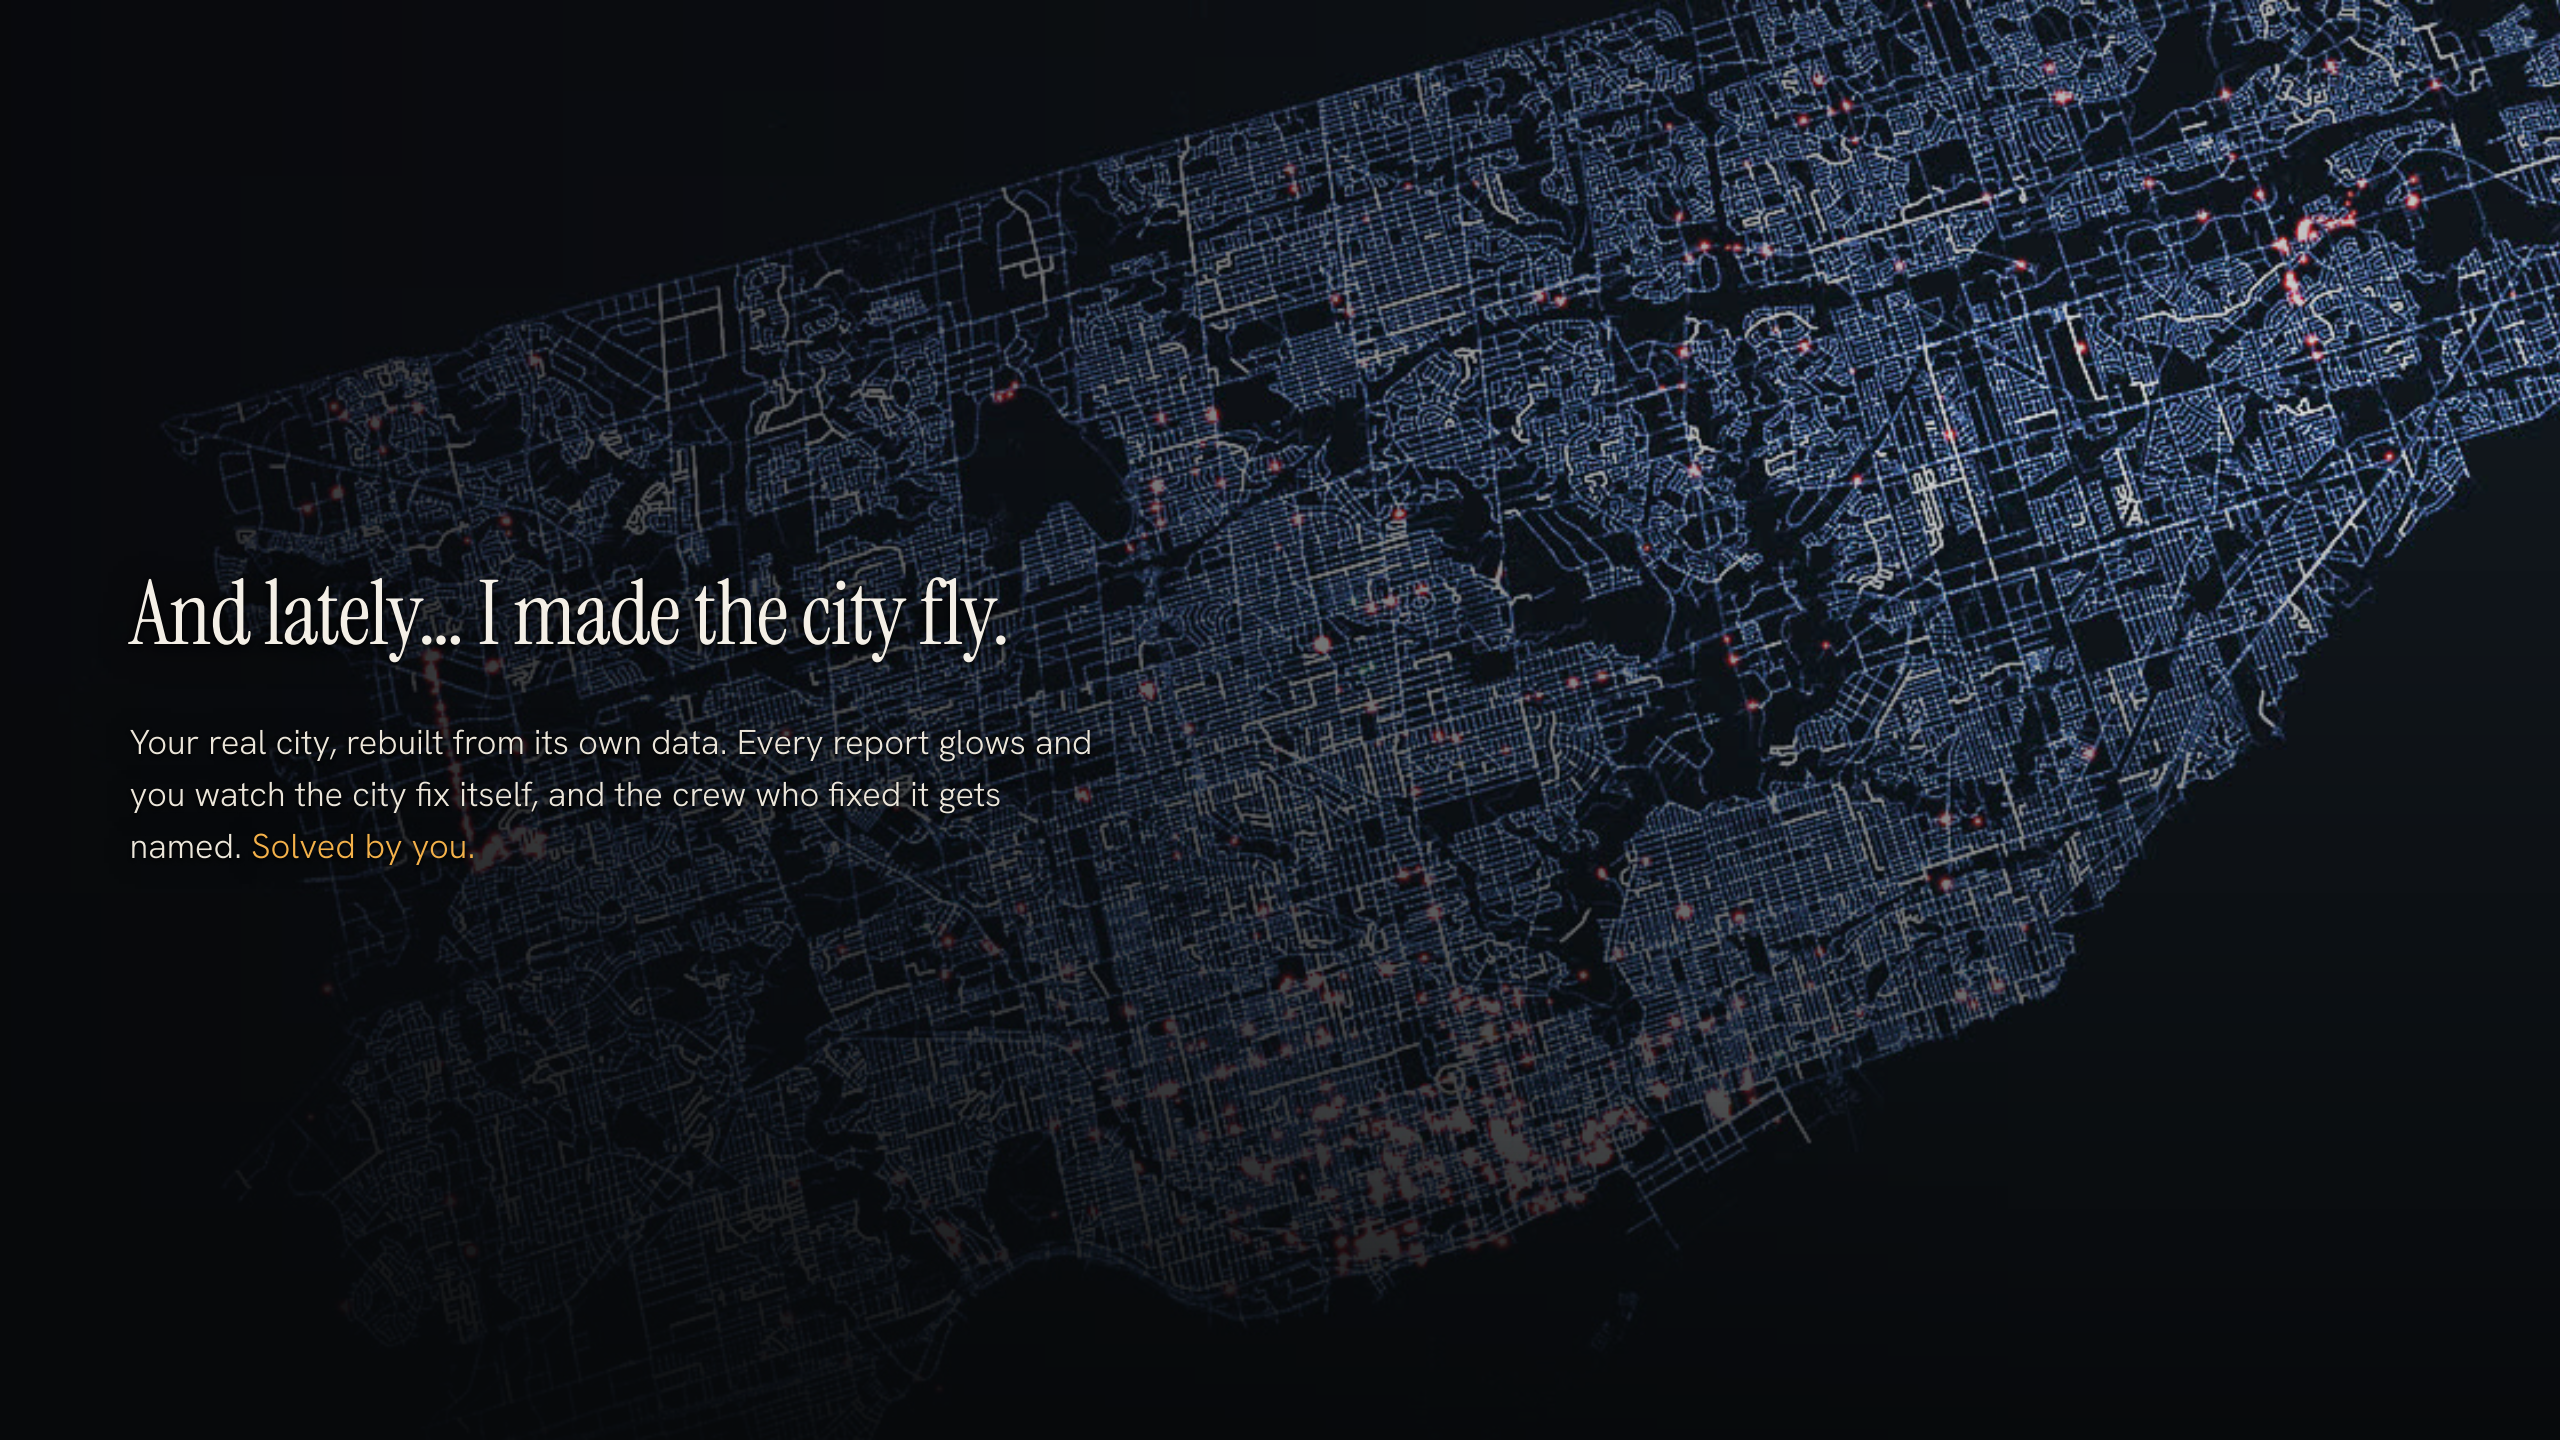

One photo. Or five words.

Thirty seconds, and it's on
its way to the city and your
councillor. *Make not using it
feel stupider than using it.*

The data was always there.

Close to two million pieces of public infrastructure across five cities, catch basins back to the 1840s, open for years. Nobody connected it. I did. Not a complaint box, a layer on the city's own data. The technology was never the bottleneck. We were.

And lately... I made the city fly.

Your real city, rebuilt from its own data. Every report glows and you watch the city fix itself, and the crew who fixed it gets named. **Solved by you.**

Now look around this room.

A campus like this one is a small town. So is a hospital, a business district, a building you run. If you can draw it on a map, it can be live in a week.

Solve Canada

The fifth city is a Tuesday afternoon.

I used to say that as a promise. Last week it happened. I launched two more cities in a single afternoon. This is [SolveCanada](#), one platform, every city on one map. Not a money problem, not a talent problem, an architecture problem, which means a choice.

[SolveTO](#)[SolveSAUGA](#)[SolveMILTON](#)[SolveKITCHENER](#)[SolveWATERLOO](#)

It was never the technology.
*“Unless someone like you
cares a whole awful lot,
nothing is going to get better.
It’s not.”*

DR. SEUSS · THE LORAX

*“We are here.
We are here.
We are here!”*

DR. SEUSS · HORTON HEARS A WHO

Obsession or Stubbornness?

Both.

I'm not asking permission.
I'm building it now. The only
question is who moves with
me.

Thank you.
